DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/10/2010 has been entered.

Status of Claims

Claims 1, 7-10 and 24 are pending in this application.

Acknowledgment of Amendment

The amendment filed on 03/31/2010 overcomes the following objection(s)/rejection(s):

The rejection of claims 1, 7-10 and 24 for failing to comply with the written description requirement has been withdrawn in view of Applicants amendment.

Response to Arguments

Applicant's arguments with respect to claims 1, 7-10, and 24 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

Newly submitted claims 1 and 9 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The Examiner notes that the amendment filed on 03/31/2010 where claim 1 has been amended to include the following limitation : managing a table that represents a correspondence between an index Q and an non-decoding pass number NDP(Sb) of a subband Sb" however, this limitation is directed towards an embodiment that was not elected in the restriction requirement. This claim limitation is described in the first embodiment, and Applicant has elected the third embodiment.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1, 7-10 and 24 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 7-10, and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re Claims 1 and 9, Applicant claims "managing a table that represents a correspondence between an index Q and a non-decoding pass number NDP(Sb) of a subband SB". However, it is unclear to the Examiner what the "index Q" represents. Does the "index Q" represent quality, quantization or a relationship between the non decoded subbands in a subband? The Examiner notes that paragraph [0116] describes a relationship between a variable Q (Q factor) and the number of non-decoded bit plane in a respective subband; however this relationship is not clearly defined or recited in the claims. The examiner is unable to form a reasonable interpretation of the "index Q" or the relationship between the non-decoding pass number of subbands.

Re claims 7-8, and 24, which fails to remedy the issue stated above, thus claims 7-8 and 24 are too rejected as being indefinite for depending upon independent claim 1.
